## **Indigo Adults/Children**

### **Traits**

- 1. May be strong willed independent thinkers who prefer to do their own thing rather than comply with authority figures/parents.**
- 2. Have a wisdom and level of caring beyond their youthful experience.**
- 3. Traditional Parenting and discipline strategies don't appear effective with these children. If you try to force an issue, a power struggle is the typical outcome.**
- 4. Energetically, Indigos are vibrating at a much higher frequency so they can get scrambled by negative energy (human or machine).**
- 5. Emotionally they can be reactive and may have problems with anxiety, depression or temper rages if not energetically balanced.**
- 6. Are creative right brain thinkers, but may struggle to learn in a traditional left brain school system.**

**7. Often Indigos are diagnosed with ADD and ADHD since they appear impulsive (their brain can process information faster) and they require movement to help keep them better focused.**

**8. Indigos are very intuitive, and may see hear or know things that seem unexplainable.**

**9. Indigos have more problems with food and environmental sensitivities, since their system is more finely tuned.**

**10. When their needs are not met, Indigo adults/children seem self-centered and demanding, although this is not their true nature.**

**11. Indigos have incredible gifts and potential, but they may be shut down when not properly nurtured and accepted.**

**Indigo's can sense dishonesty, like a dog can sense fear. Indigos know when they're being lied to, patronized, or manipulated. And since their collective purpose is to usher us into a new world of integrity, the Indigos inner lie-detectors are integral. As mentioned before, this warrior spirit is threatening to some adults. And the Indigos are unable to conform to dysfunctional situations at home, work, or school. They don't have the ability to dissociate from their feelings and pretend like everything's okay ...unless they are medicated or sedated.**

**Indigo's are born onto the Indigo Soul Ray of Incarnation and Evolution. This means they have access to the gifts of clairvoyance and healing. They are also able to access what may be termed the Fourth and Fifth Dimensions of Consciousness, while most humans have access only to the Third and Fourth. This Higher Dimensional access, together with the Indigo Ray soul gifts, means that Indigos are naturally more intelligent, more sensitive and more clairvoyant. They are also creative, and often able to access the left and right brains with ease, making them artistically gifted, but also technologically competent and adventurous.**
